

The 2017 Dewald Roode Workshop on Information Systems Security Research

IFIP WG8.11/WG11.13 (<http://ifip.byu.edu>)

October 6-7, 2017 (Friday – Saturday noon)

University of South Florida, Tampa, FL, USA

Location: TradeWinds Island Resort, St. Pete Beach, Florida

CALL FOR PAPERS

The ninth Dewald Roode Workshop on Information Systems Security Research will continue the efforts to advance the discipline of information systems security through the creation, dissemination, and preservation of well-formed research, following the success of the first eight Information Systems Security Research Workshops (University of Cape Town, May 2009; Bentley University, October 2010; Virginia Tech, September, 2011; Brigham Young University, September, 2012; University at Buffalo, October, 2013; Newcastle University Business School, June 2014; University of Delaware, October, 2015; University of New Mexico, October 2016). The active discussions in the workshop provide participants specific feedback on their research.

As in the previous eight years, the workshop places a premium on research with highly reliable and validated theories, empirical data, and quantitative/qualitative social scientific methodologies. It is intended to nurture individual papers for submission to a wide variety of top quality research journals. (See <http://ifip.byu.edu> for past DRW papers which have been published in journals.)

Selection for the workshop is competitive, and only authors of the accepted papers and the active working group members will be invited to participate.

Anchoring the workshop to information systems means that the research will attend to and extend the social, organizational, and managerial literature in the focal area.

Note that this is not an appropriate venue for papers with a purely technical, design-science, or economic approach. While we assume an effective foundation in information security technology, we regard information systems risk broadly, for example, computer crime, employee misconduct, cyber warfare, cyber terrorism, human error and/or accident, natural events, etc. We also address information systems security broadly, for example, policies and policy compliance, diverse security behaviors, privacy, awareness, strategy, audit, planning and control. These and related research topics will be the focus of this workshop. Topics may include (but are not limited to):

- Theoretical and empirical analyses of information security behavior
- Adoption, use, and continuance of information security technologies and policies
- Compliance with information security and privacy policies, procedures, and regulations
- Investigations of computer crime and security violations
- Motivators and inhibitors of employee computer crime
- Forensic analysis of security breaches and computer crimes
- Individual, organizational, and group information privacy concerns and behaviors
- Legal, societal, and ethical issues in information security
- Neurosecurity - NeuroIS investigations of information security behavior

Conference logistics

General Chair

Manish Agrawal, University of South Florida, USA

Program Chairs

Burcu Bulgurcu, Boston College, USA

Jeffrey Wall, Michigan Technological University, USA

Jingguo Wang, University of Texas at Arlington, USA

Submission Information:

Submission deadline: June 1, 2017

Notification to authors: August 1, 2017

Attending participants must register by August 15, 2017

Deadline for final papers: September 5, 2017 (to be distributed to workshop attendees in advance)

Link:

<https://easychair.org/conferences/?conf=2017dewaldroodeworks>

Manuscripts will be prescreened by the program chairs to ensure that all papers sent to reviewers are reasonably complete, well-formed, and appropriate to the scope and mission of the workshop. Double blind reviews will follow for prescreened papers. Authors can submit the manuscripts as “early stage” or “completed papers.” *Manuscripts must be anonymous for the review process.*

In recognition that the review process greatly relies upon a scarce resource of the services of reviewers, *authors, by the act of submission, are implicitly promising to serve as a reviewer on one to two conference papers, if requested.*

For general questions about the workshop, please contact Manish Agrawal at magrawal@usf.edu. For questions about the program, please contact Burcu Bulgurcu at burcu.bulgurcu@bc.edu ; Jeffrey Wall at jdwall@mtu.edu or Jingguo Wang at jwang@uta.edu .

Workshop Date and Location:

The workshop, hosted by the University of South Florida, FL, will take place on October 6-7, 2017 at TradeWinds Island Resorts on St. Pete beach (<https://www.tradewindsresort.com/explore/resort-map>). The hotel and university are located in Tampa, FL. There are two convenient airports: Tampa International Airport, and St. Pete Clearwater International Airport.

Sponsorship

The IFIP Working Group 8.11/11.13 holds The Dewald Roode Workshop on Information Systems Security Research annually. WG 8.11/11.13 ([H. Raghav Rao](#), Chair; [Allen Johnston](#), Vice Chair) is the IFIP Working Group on Information Systems Security Research. Please visit <http://ifip.byu.edu> for more information on the IFIP Working Group 8.11/11.13 and for past workshop proceedings.

Travel support

Limited travel grants may be available to support authors/ co-authors from developing countries. For more details please check with Professor H. R. Rao.
